

Senior Software Engineer and Technical Lead with 13+ years of experience building scalable systems and full-stack enterprise applications, microservices, SPAs, and cloud-native platforms. Expertise in C#, ASP.Net, Angular, TypeScript, REST APIs, Azure, and modern frontend architecture. Proven track record leading engineering teams, modernizing platforms, improving developer productivity, and delivering customer-focused solutions in fast-paced environments.

Technologies and Languages

- Languages: C#, TypeScript, JavaScript, SQL, HTML5, CSS3
- Frontend: Angular, React, RxJS, Angular Material, AG Grid, Jest, Jasmine
- Backend: ASP.Net Core, REST APIs, GraphQL, Entity Framework, Microservices
- Cloud & DevOps: Azure, Azure DevOps, AWS, Docker, Kubernetes, GitHub Actions, Azure Pipelines, Jenkins, CircleCI, Octopus Deploy
- Databases: SQL Server, PostgreSQL, MongoDB, Oracle, Azure SQL
- Architecture: SPA/PWA, Microservices, CI/CD, API Design, Distributed, Event-Driven architecture
- Security: OAuth, OpenID Connect, SSO

User Experience

The Predictive Index

Oct 2021 – Nov 2022

Remote out of Milwaukee Area, WI

Individual Contributor (IC) Full Stack Engineer transitioning logic from role-based access control to attribute-based access control. Subsequently, promoted to Lead Engineer (LE) with the specific objective of conceptualizing and releasing an internal Angular component library.

- Managed and mentored a team of 3 engineers, improving delivery consistency and code quality through code reviews, engineering standards, and collaboration with Product Owners on delivery expectations.
- Led development of a reusable NPM-based UX component library (Angular Material, AG Grid), improving UI consistency and reducing frontend development time across teams.
- Implementation, modification and maintenance of RESTful APIs to integrate new access control changes.
- Established the foundational Angular CLI project structure and development standards, accelerating onboarding and improving maintainability.

Software Engineer II
Forecasting

goPuff

Feb 2021 – Oct 2021

Remote out of Milwaukee Area, WI

IC Full Stack Engineer playing a pivotal role within the new internal Forecasting Engineering initiative. Tasked with developing a green field application aimed at improving our ability to forecast staffing requirements.

- Automated reporting workflows, increasing end-user efficiency by over 500% and reducing manual processing time.
- Designed and launched a React-based web application that improved user experience and streamlined forecasting workflows.
- Development of new RESTful APIs, utilizing GraphQL to enhance efficiency and flexibility in data querying.

Senior Software Engineer
Essentials

InvestCloud

Jul 2019 – Jun 2020
Milwaukee Area, WI

IC Full Stack Engineer, I played a pivotal role in the development of a greenfield flagship application, showcasing innovative architecture and leveraging a modern technical stack.

- Integrated Azure Service Bus into a microservices architecture, improving system communication and scalability.
- Implemented robust frontend unit testing standards, resulting in improved efficiency.
- Successfully launched the flagship Single Page Application (SPA) built with Angular.

Team Lead
New Lending Platform

Finastra

Apr 2016 – Jul 2019
Milwaukee Area, WI

Lead Engineer (LE) of a greenfield initiative, spearheading the effort to replace existing applications with a modern Single Page Application (SPA). Played a pivotal role in delivering a cutting-edge solution to meet our business objectives.

- Owned architecture and development of three C#/.NET microservices supporting a new lending platform, ensuring scalability and reliability.
- Introduced Angular animations to elevate the overall user experience.
- Redesigned CI/CD pipelines, reducing deployment friction and accelerating release cycles.
- Modernized legacy applications by replacing unsupported VB6 and Flash components with C# ASP.Net solutions.

Senior Software Engineer
Consulting Services

Blue Yonder

May 2015 – Mar 2016
Greater Milwaukee Area, WI

Senior Consultant focusing on bridging the identified gaps between our core software platform and customer requirements within the solutions. This involved either implementing customer-specific changes or devising generic solutions to enhance the core product to better meet customer needs.

- Spearheaded the implementation of Voice enhancements.
- Led collaborative efforts with customers directly to understand their unique needs and tailor solutions.
- Worked cross team to introduce customer specific enhancements to the core product.

Software Developer
Dynamis

Iptor

Dec 2013 – May 2015
Greater Milwaukee Area, WI

IC Full Stack Engineer, modernizing of our warehouse management application. Working within a team of four engineers, our objective was to transition from a legacy on-prem VB .NET application to a modern AngularJS web-based solution.

- Developed Entity Framework RESTful APIs to facilitate seamless integration ensuring data interoperability.
- Implemented SOAP-based Web Service integration with third-party systems.
- Led development efforts to separate core applications to introduce new products.

Technical Consultant Intermediate
Consulting Services

Blue Yonder

Dec 2009 – Dec 2013
Greater Milwaukee Area, WI

Product Development Intern advancing our core product by implementing new features and addressing issues. Upon transitioning to a full-time role, I continued to contribute significantly by assisting in project implementations.

- Collaborated closely with customers to understand their needs and translate them into actionable solutions.
- Implemented threaded session expiration feature in our core product, enhancing security.
- Provided comprehensive support throughout all phases of projects, from analysis and design to implementation.

Education and Certifications

- **B.Sc. Computer Science**, University of Wisconsin – Milwaukee

2006-2010
